Please join us for a hands-on workshop on Zotero with Peter Bae. Zotero is a free, open source Firefox extension that will help you collect, cite and manage research sources. Here's your chance to see how current information technology can assist you with these tedious tasks. Zotero was developed at the Center for History and New Media at George Mason University. There will be a demonstration of Zotero and workshop participants will have a chance to use Zotero and see its integration with Microsoft Word.

Peter Bae is Bibliographer for History and Korean Studies and ILL Specialist at the University at Albany Libraries. He regularly teaches workshops on Zotero.

**There is no registration fee, but pre-registration is required. Seating is limited.**
